Summary

I'm a passionate and aspiring Front-End Web Developer that engages more in software related technologies, especially in the development of applications and websites. A tech-savvy person that loves web technologies and software customizations and enjoys open-source applications with the hopes of building one inside a company. A flexible person who can adapt to the changes in the work environment and has one primary goal which is to learn and gain more knowledge.

Experience

07/2022 - 01/2023

Web Developer Intern @ Rengga

Rengga is an international company which provides web service solutions to different clients from across the globe.

- Building a client e-commerce website using Typescript, Angular, and .NET
- Testing the functionalities of the website and execute to production
